Keep Cabby City Hall

- The old Cabby City Hall is an
- amazing place it is a good place
- to go and spend time with your family
- I think we should keep the old city hall
- and turn it into a historical mark
- because it will benefit Cabby City
- historically significant has a lot of history
- significance
- First, it is historically significant it has been
- many different things over the years like a jail,
- library, and a fire station
- Next, it will benefit Cabby City we will make
- more money and we will get a higher per
- population.

The last reason is it's architectural
significant it is a very sturdy building

made out of brick and one area it has

metal bars. This is

finally that is why I think we should

keep the old city hall and turn it into a

historical landmark because it is historic

Keep the old city hall and turn it into a

historical landmark because of its

historical landmark because of its

historical significant, and it is history

significant and it will benefit the city

Thank you

Stephen

I think that the old Canby city hall should become a historical landmark because of the historical, architectural and environmental significance.

First, the old city hall has been an important part of Canby's history. For an example, the city hall is about 80 years old and kept lifesaving fire equipment for the fire department. There was a jail in the city hall too.

Next, the old city hall is architecturally significant because it has kept a lot of its original design since it was first built. One example, is that the city hall has kept its square pyramid roof on the rear side wing. Also, it has kept the sash vinyl windows.

Also, the old city hall has been a visual landmark to the community for many years. The city hall is different from the rest because it has interesting landscaping and a wrought iron fence.

In conclusion, that is why I think that the old Canby city hall should become a historical landmark because of its historical, architectural and environmental significance.

Melia

Did you know the old Canby city hall used to be a fire station, a library and a

city hall? Hi I'm Melia from the elementary

School, Philander Lee, and I'm here to tell you

why we should make the old city hall

a historical landmark! First, I think the

old city hall should be a historical

landmark because it is so important

to our history, and this is why I

think so, it was used as a policy and

decision-making area. Also, it was used as a

place where people paid bills for four

decades! Second, in my opinion the design is

important. For example, it's made with stucco walls,

Case

Document on City Hall I
I hear people are talking
about Cambry's City Hall and
I we should make it a historic
al site for historical, architect-
ural, and benifital reasons.

First, the historical reasons:
One, there is a jail once
used around 1901. Two, there's
a fire station that was never
useful. Three, there was a library
that got turned into a meeting
room for Herman and

~ case
Document on City Hall's
Albert Lee, Joseph and William
Knight, along with Ormal R.
Mack. Where did the library
go? It took the place of a hardware
store on September 16, 1937,
the same day the old library
got into the meeting room.
Wow, so much history!

Second, the architectural re-
asons: Well, this fascinating
building has thick, brick walls
with a stucco interior

only 12

In my opinion, city hall should be turned into a historical landmark. The building is 85 years old. City hall is also an important part of Canby history. It has an interesting architecture that can still be seen today.

City hall is an important landmark in Canby. It is my request to make city hall a historic landmark.

First, It should be turned into a museum. I think it should be a museum because it has a jail that

isn't used any more. It would also be a great place to learn about the first members of city hall and the early residents. The building was also part of a fire station and a library. These are just a few historical facts about why it should be a historical landmark.

Next, I would like to talk about architecture. Over the years Canby city hall has kept many features of the

design. Earlier I discussed the jail. For example it had barred windows, a single pane picture window and a metal door that is still there today. It also has a pyramid roof to help hang things with.

That display would be ideal for a museum. Finally, I would like to discuss the environmental importance of Canby city hall. In 1937 city hall made improvements like landscaping and sidewalks to the city

of Cooby. The old city hall led to important meetings like the donation of Wait Park. For over 85 years Cooby city hall has cherished by Cooby residents. Cooby city hall has been one of the biggest monuments in Cooby.

In conclusion, Cooby city hall deserves to be a historical landmark. Its history is great. The architecture is terrific. The communication with the people is off the charts.

In the end it turned out
to be a truly remarkable
place.
